

# Subject: Application for Junior Web Developer

Dear [Hiring Manager , Freelancer and Recruiter],

I am writing to express my interest in opportunities as a Junior Web Developer or AI-focused Developer. I am currently a Grade 11 student in Addis Ababa, Ethiopia, but I have gained strong practical skills in web development and artificial intelligence through bootcamps and intensive summer programs.

I specialize in HTML, CSS, JavaScript, and the MERN stack, with additional exposure to machine learning and deep learning. Beyond technical skills, I am a fast learner, creative problem solver, and strong team player. I take pride in adapting quickly to new challenges and delivering results.

Although I am at the beginning of my career, I am confident in my ability to add value to projects. To build trust, I am even willing to work on a “pay-after-results” basis for freelancers or companies, proving my skills before requesting payment.

I would love to work with your team or project. Please feel free to contact me at:
